A Message from Carol

"As Mayor the past 7 yrs **responsible Financial Management** has been top of mind and will continue to be first. It will be crucial for Council to work with staff to **prioritize** "our needs" from "our wants" to ensure our City weathers the effect of world wide economics that trickle down to affect business, development, all levels of government, right down to our taxpayers and residents.

Housing is also a mainstream issue; however it is more complex than what appears on the surface. I will actively pursue bringing diverse affordable housing options through Council to enhance our community.

We all have to get somewhere, making **Transportation** an issue that affects all of us. The gridlock commonly referred to as the "Colwood Crawl" is NOT just our problem. Getting people out of their cars is the priority. Working with other municipalities, we need to continue pressuring the provincial and federal governments to get the infrastructure changes required, and to provide better incentives - other than raising gas prices - to motivate drivers to become passengers.

I have worked with and developed **respectful relationships** with members of other councils and higher levels of government to help us work toward these goals."

Sewers/Sidewalks (or the lack thereof) are still a concern. Infrastructure planning is in process to capitalize on development contributions to expand both. - Carol
